Learning by design

A fictional eight-slide demonstration of a portable brand system.

From identity to a slide system

The reference anchors the brand. Composition serves the message.

EDITORIAL / CONTEXT

Room for attention

A relevant image establishes context. Large type makes the subject clear without decorative panels.

Three layers, distinct responsibilities

01 Identity

Colors, fonts, original assets and evidence.

02 Visual system

Measured regions and reusable compositions.

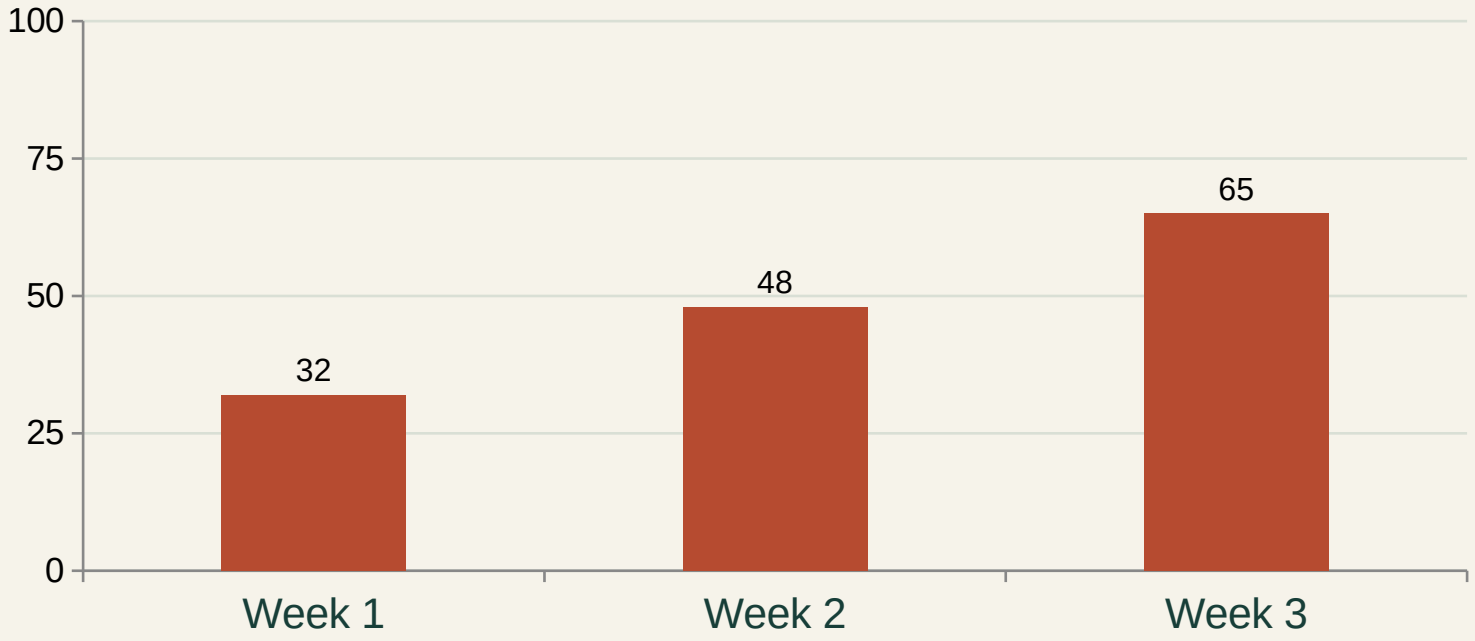

03 Content

A clear message, supported facts and useful examples.

Choose the approach that fits the task

Decision	Faithful reproduction	Brand adaptation
Starting point	Import the source deck	Extract the identity
Composition	Preserve existing masters	Choose suitable layouts
Review target	Compare with the source	Compare with the brand

Illustrative practice completion

Illustrative data

These invented values demonstrate a native editable chart. They are not research findings.

Review is part of construction

01 / Build

Bind content to measured regions.

02 / Inspect

Render every slide and compare.

03 / Repair

Fix affected objects and verify again.

A consistent brand.
A useful presentation.

Replace the fictional identity with an inspected reference, then build and review with your own tools.
