Completed items by region

Comparable categories, two periods and a zero baseline.

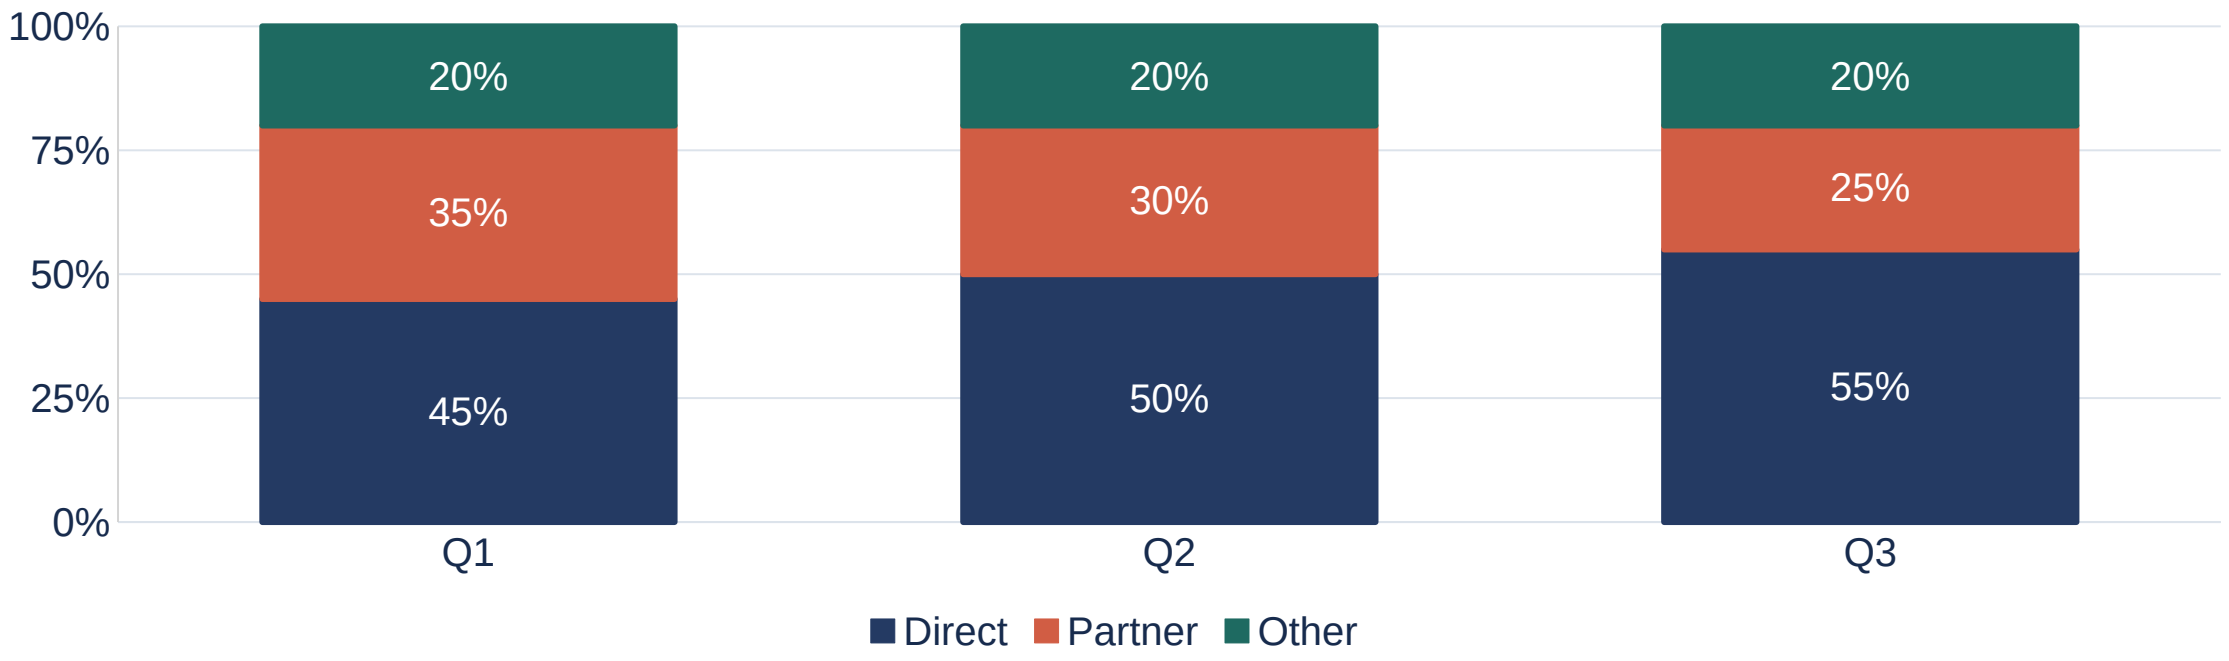

Delivery time over six months

Two series, a shared time scale and explicit units.

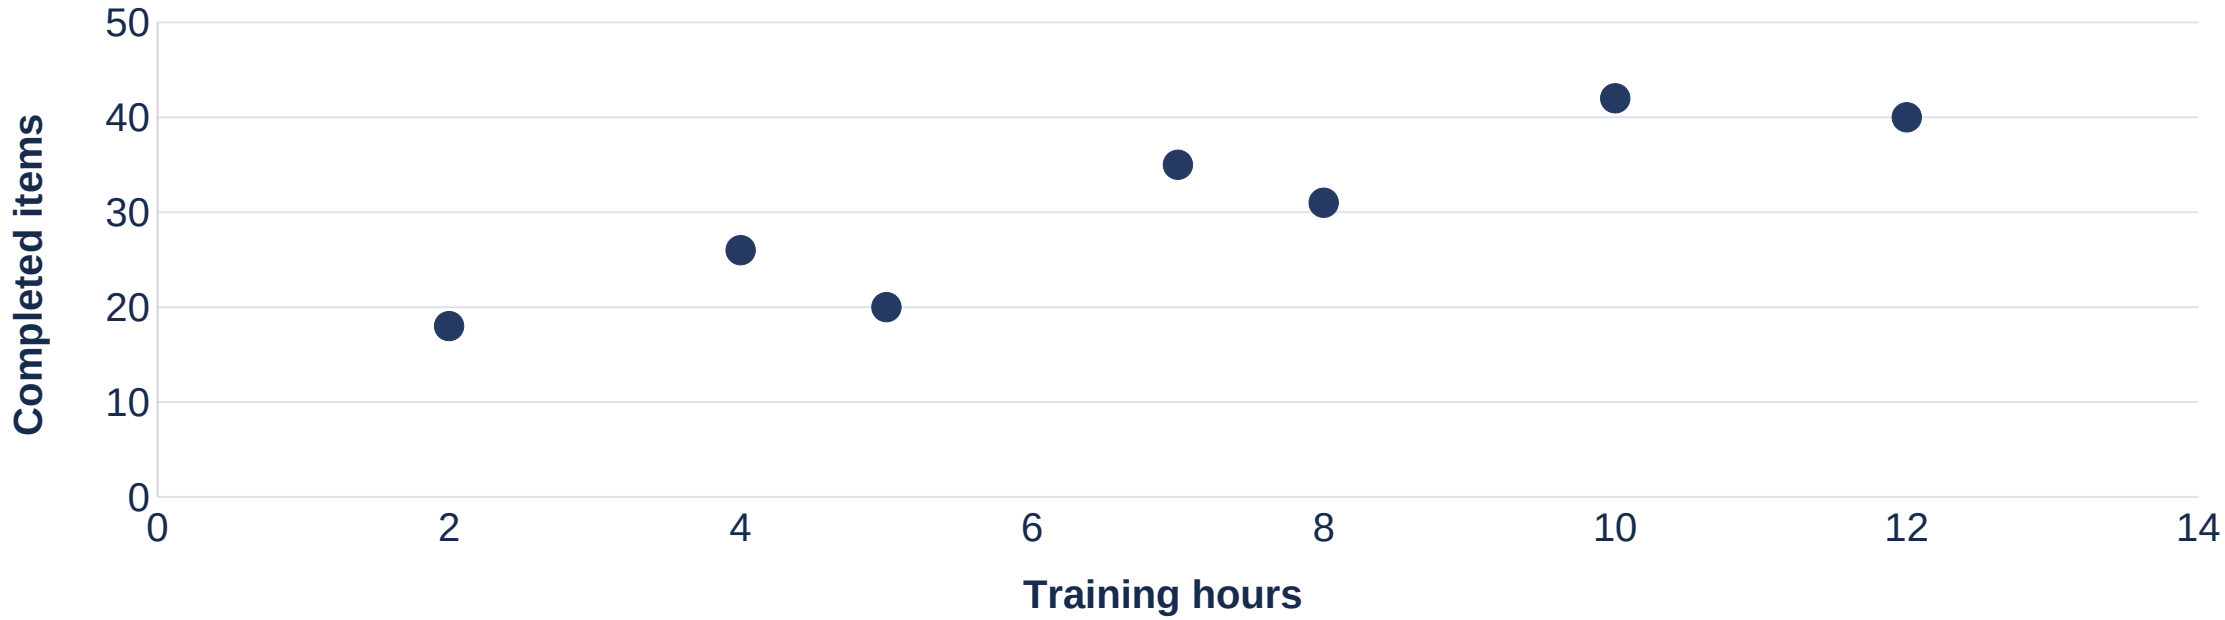

Channel mix

Each quarter represents the same whole: 100%.

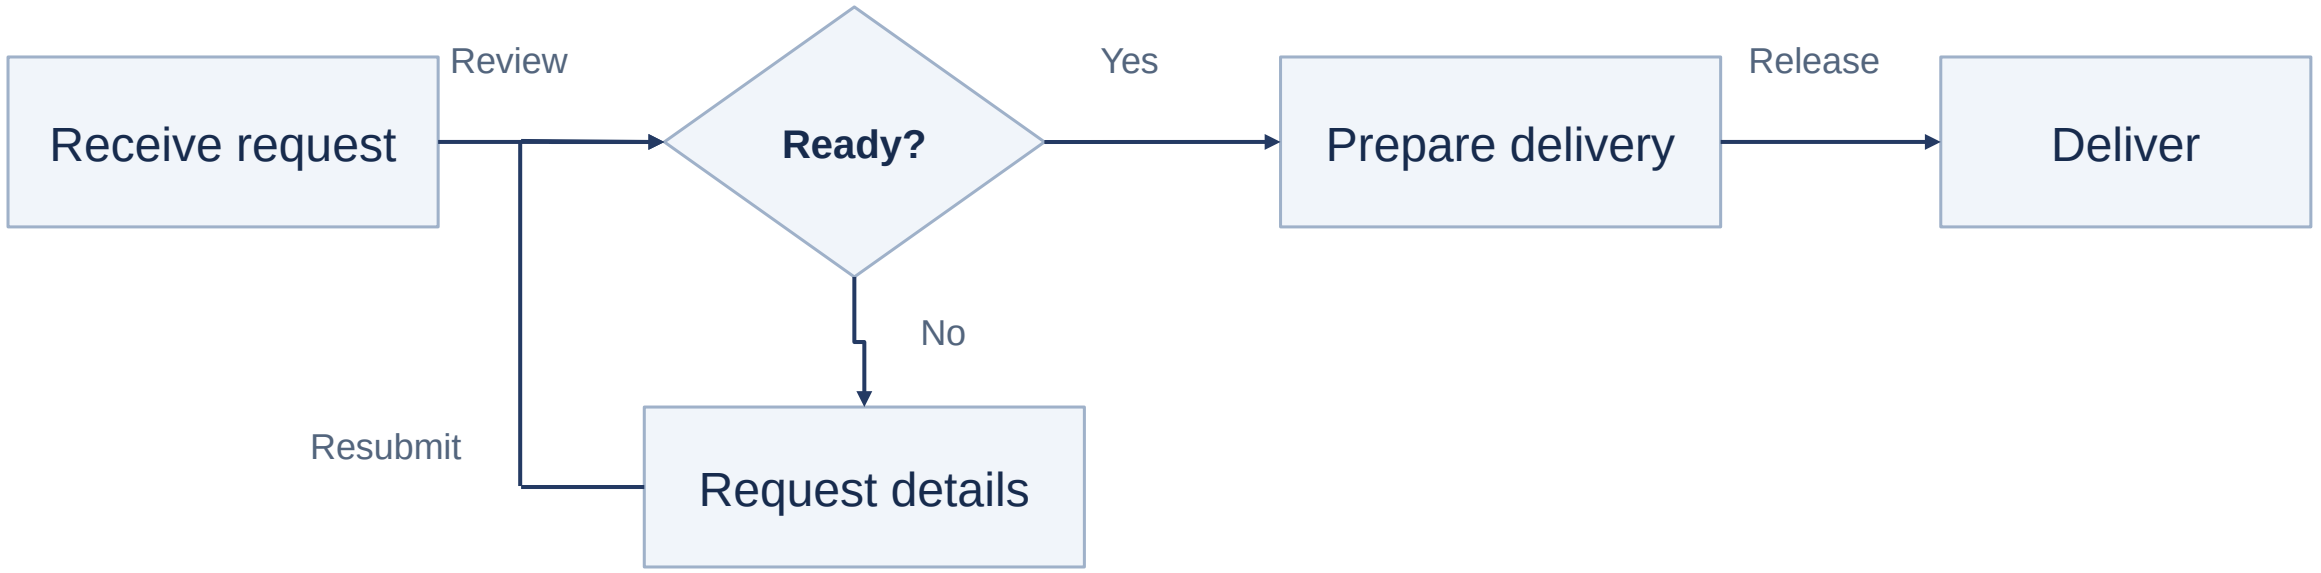

Training and output

Paired observations. Association does not establish causation.

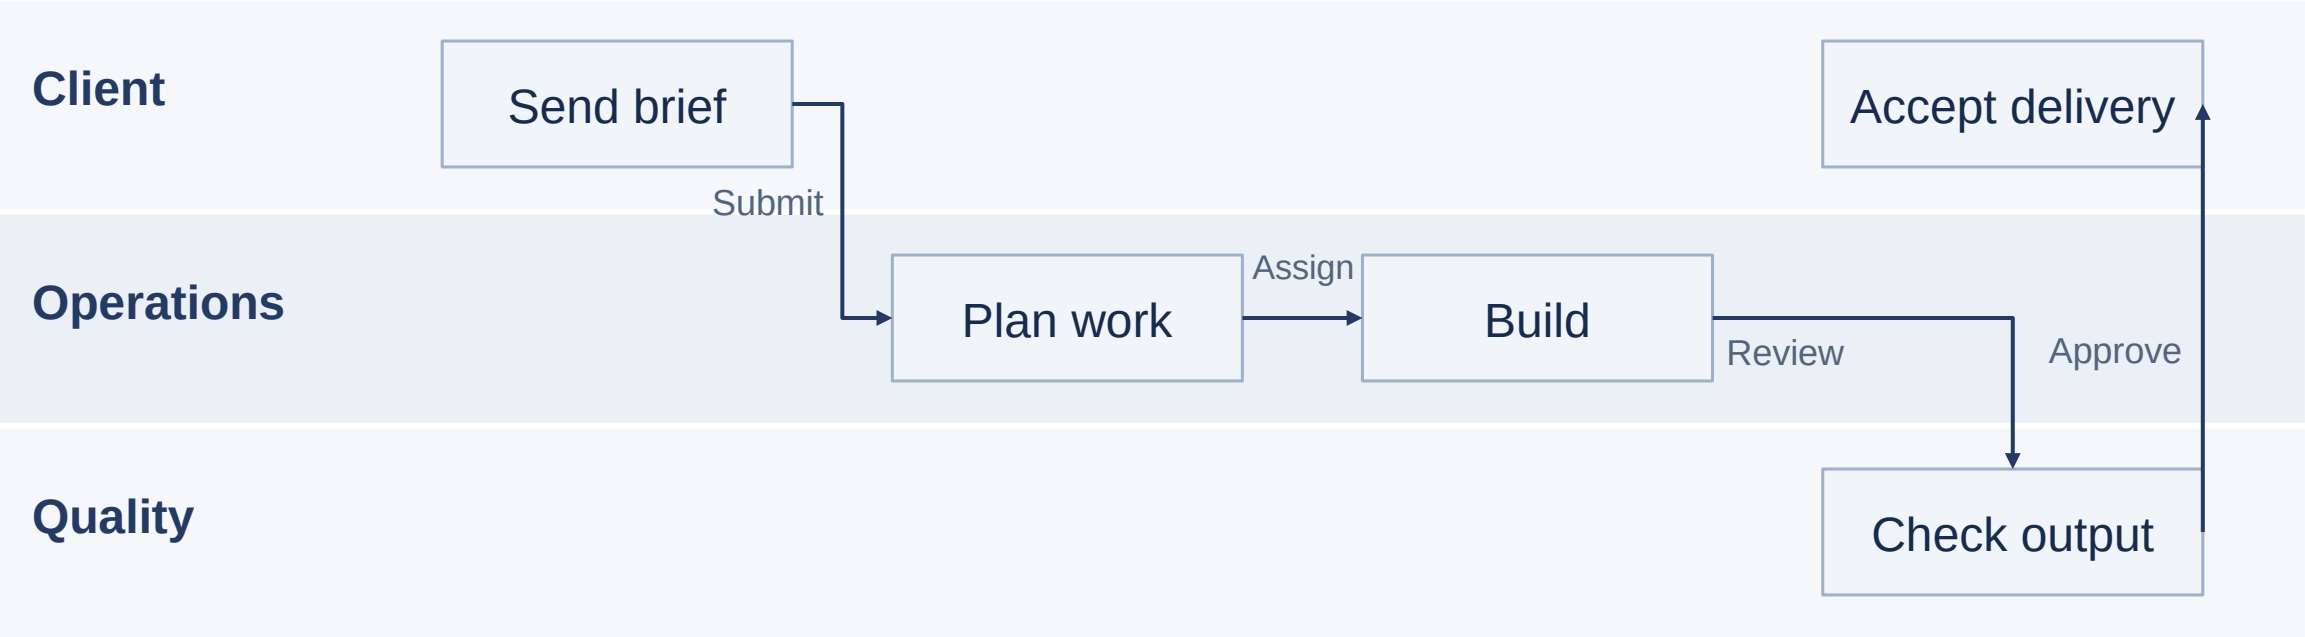

Decision and rework

A decision needs both destinations and a visible return path.

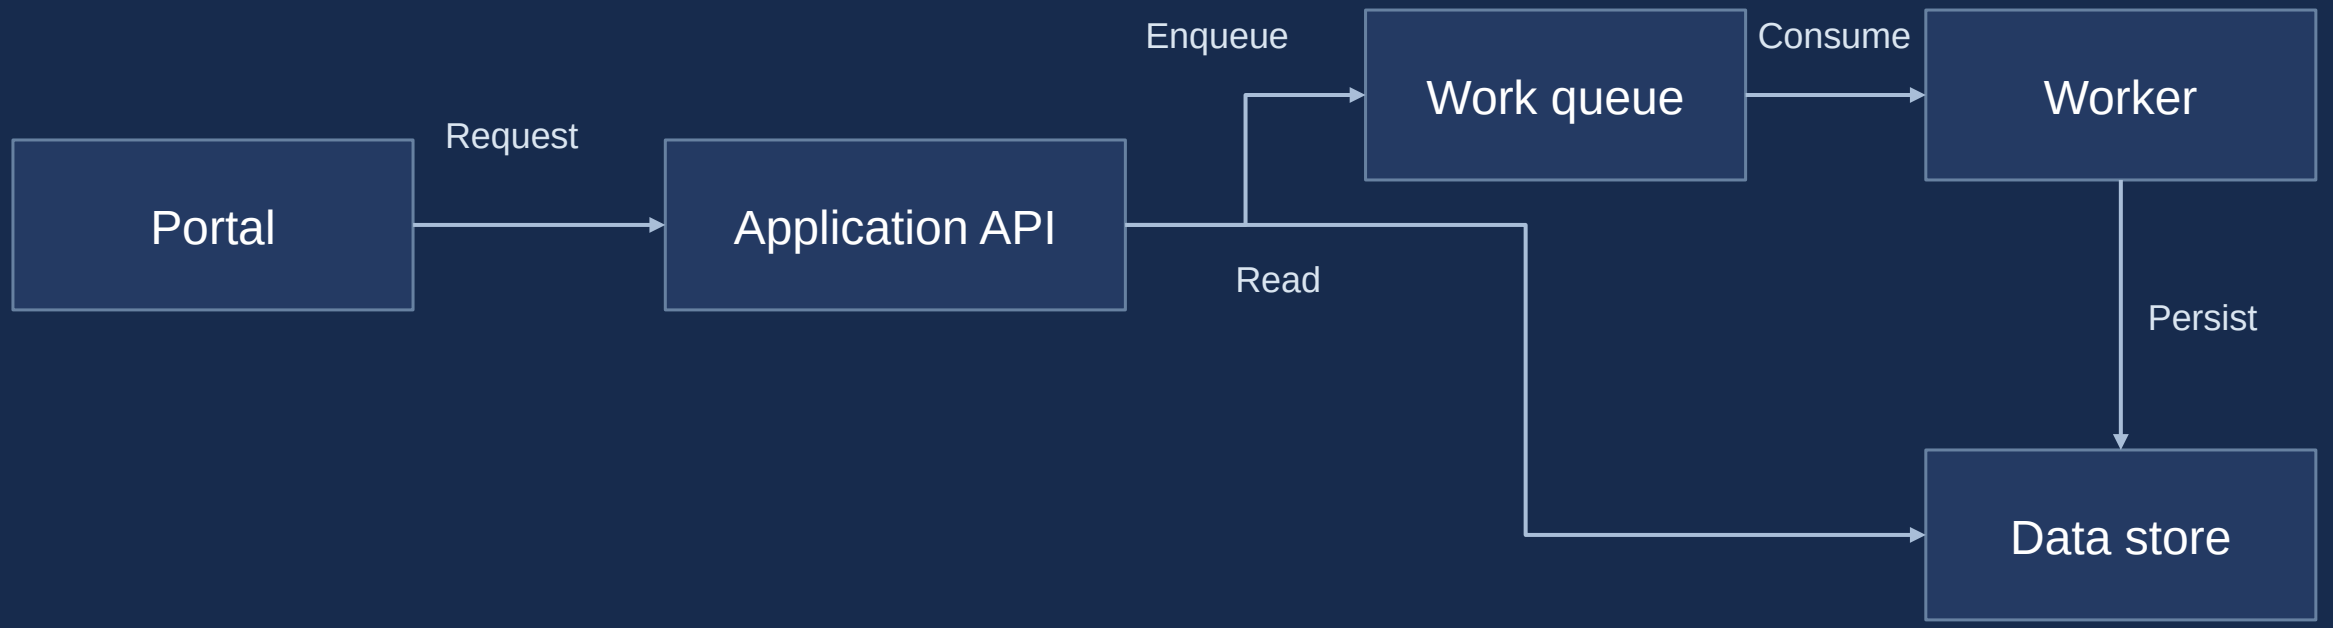

Responsibility and handoffs

Lane membership expresses ownership. Arrows express handoffs.

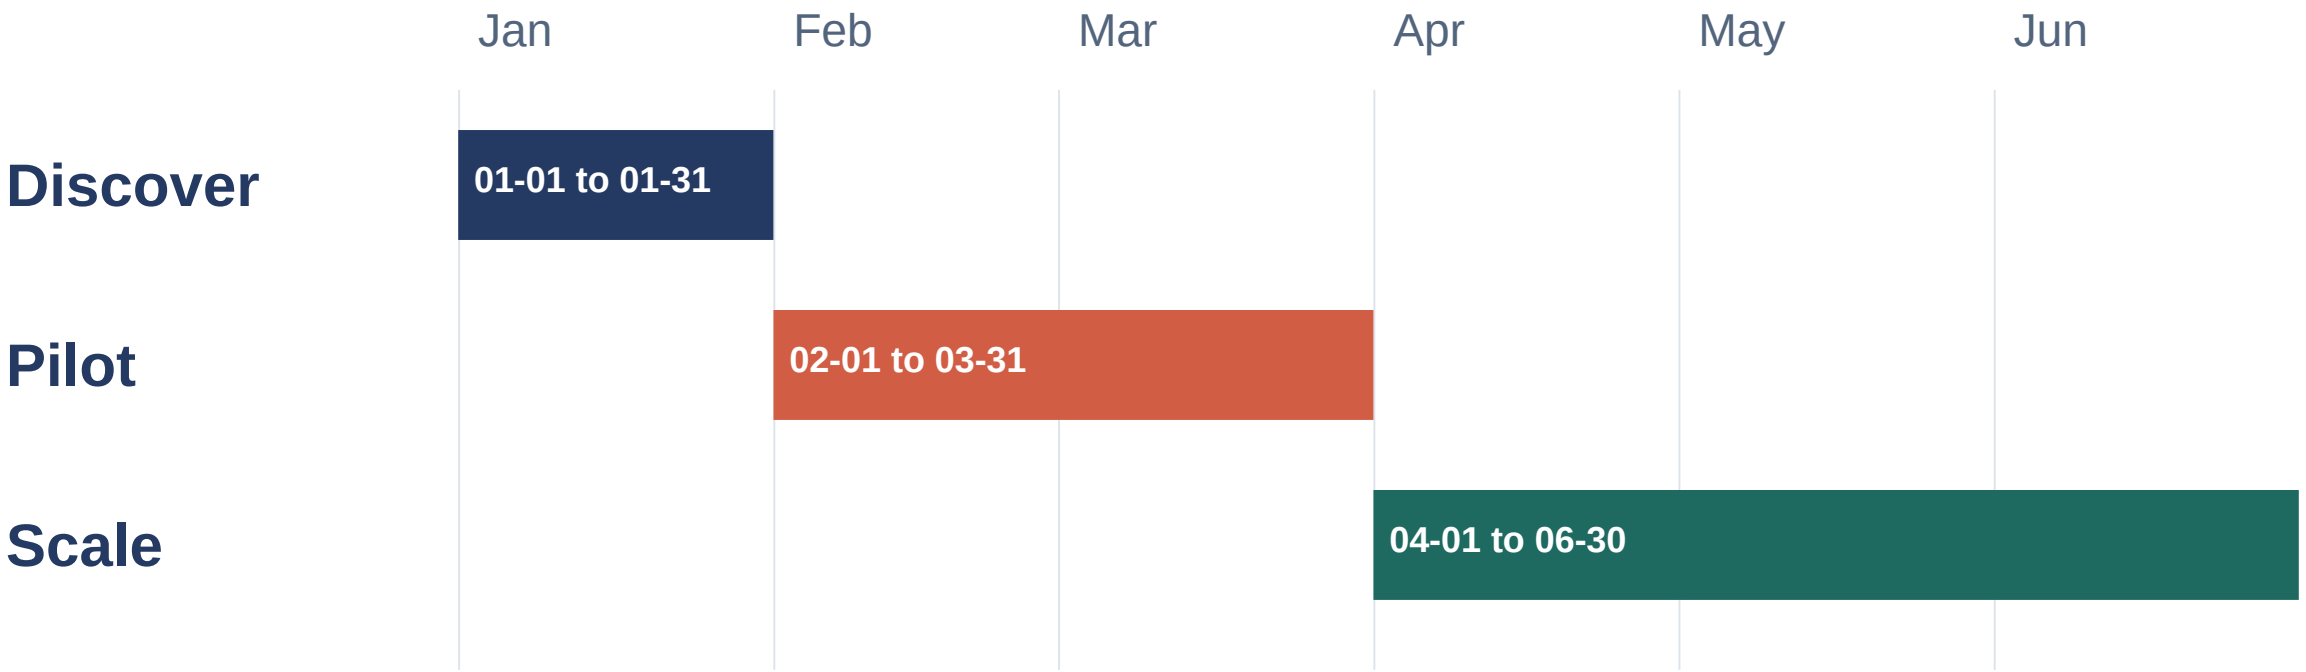

System relationships

An asynchronous path and a distinct read connection.

Roadmap with real durations

Jan–Jun 2027. Bar widths follow elapsed days, not equal visual slots.

Categorical risk matrix

Qualitative placements for a fictional assessment, not numeric probabilities.

	Low likelihood	Medium likelihood	High likelihood
Low impact			**Copy error**
Medium impact			**Supplier delay**
High impact		**Access failure**	

Decision criteria

A comparison preserves common criteria and explicit tradeoffs.

Criterion	Option A	Option B
Delivery window	2 weeks	4 weeks
Scope	Core workflow	Core + integrations
Operating model	Manual review	Review + automation
Key constraint	Team availability	Integration readiness
